EXPERIENCE

Developer   2022-Present
CYLNDR Studios   Durham, NC

- Develop web applications, landing pages, games, HTML emails and animated banners for agency clients and internal initiatives
- Integrate websites into various CMS platforms and train team members on effective content management workflows
- Troubleshoot and resolve QA tickets efficiently, using Jira for issue tracking and cross-team communication
- Mentor other developers providing code reviews, technical guidance, and best practices to improve team efficiency
- Promoted from Junior Developer after 18 months
- Examples of work:
  [Crypto Craze](#): Developed a Vue-based client game, leveraging Pinia for state management and creating dynamic SVG animations
  [McKinney.com](#): Developed an enterprise Wordpress site using a component-based Vue theme with custom Gutenberg blocks and ACF
  [Hearting Pride](#): Developed Python automation leveraging Google APIs to pull data, process media and publish JSON for a digital hub
  [Are You Blacker Than ChatGPT?](#): Built an interactive web-based game for an internal initiative focused on highlighting AI bias

Publications & Web Director   2019-2024
Covenant Presbyterian Church   Fort Myers, FL

- Built and maintained a WordPress website and trained staff on content updates to ensure long-term sustainability
- Designed newsletters and brochures to attract wider audience

Program Administrator   2021-2022
North Carolina Arts Council   Raleigh, NC

- Assisted with Drupal website updates and social media analytics
- Supported leadership team and Governor-appointed Board of Dirs.
